

UK Science and Research Funding Opportunities – THAILAND

June 2025 – Issue 1.0

Instructions

This document provides a summary of funding opportunities for UK researchers to collaborate with international partners, which Thailand is one of the eligible partners. UK funding opportunities are delivered across multiple departments and organisations, and the list below (**Table 1**) is not an exhaustive list. Applicants are advised to **read the guidance note** of each call in full details, which may require Co-PI from the UK and one other country, before submitting the application. For further queries, please contact relevant UK funders / delivery partners.

Please visit this page for overall **UK Official Development Assistance Funding overview**: <https://ukcdr.org.uk/uk-oda-funding-overview/>

Summary of upcoming events:

- **Energy Modelling Platform** for Asia and the Pacific (EMP-APAC) 2025
- **Frontiers Symposium** on Circular Economy

Summary of funding available:

- **Health**: 17 programmes
- **Climate**: 3 programmes
- **Social Sciences**: 1 programme
- **Technology**: 1 programme on Space
- **Capacity Strengthening / Cross themes**: 9 programmes

Please note this document is **not** updated on a regular basis. You are encouraged to follow and subscribe to relevant e-newsletters for up-to-date notification (**Table 2**).

Upcoming event: Frontiers Symposium - *The Business Case for Circular Economy*

Date: 4 – 6 August 2025

Venue: Bangkok

Application deadline: Rolling basis – but ideally apply as soon as possible as seats are very limited

In partnership between the UK's Royal Academy of Engineering, and Thailand's Programme Management Unit for Competitiveness (PMU-C), The event will bring together leading researchers, innovators and practitioners to explore new ideas around circular economy, sustainability and using resources better. These discussions will open new ways of thinking and encourage collaboration towards a more circular future.

The event will offer a unique opportunity for delegates from different disciplines to connect and network with experts from around the world, and to explore cross-cutting issues through three sub-themes:

1. **Digital solutions and creative design for the circular economy** - harnessing advanced technologies, creative design, and digital solutions to convert waste
2. **Inclusive systems and policy development for circular practices** - building policy and frameworks for a just, effective circular economy
3. **Waste valorisation and financing strategies** - looking at the business case for waste and waste valorisation finance initiatives

Symposium format:

- 3 cross-cutting challenge-led sessions
- Seed funding grants worth £20,000 over one year will be awarded to successful collaborations developed via the symposium.

The business case for circular economy

Bringing together leading researchers, innovators and practitioners to explore new ideas around circular economy, sustainability and using resources better.

Bangkok, Thailand, 4 - 6 August

Upcoming event: Energy Modelling Platform for Asia and the Pacific (EMP-APAC) 2025

Date: 1 – 19 September 2025 (in person only)

Venue: Asian Institute of Technology (AIT), Bangkok

Application deadline: 20 June 2025

This is the first ever Energy Modelling Platform for Asia and the Pacific (EMP-APAC), which aims to

- Gather the energy planning and modelling community in Asia-Pacific to share experiences, models, and data in climate, land, energy, and water systems.
- Support human and institutional capacity in Asia-Pacific for integrated energy modelling and investment planning.
- Support the development of centres of excellence for energy planning in Asia-Pacific.
- Promote efficient and widespread use of (cost free) open-source modelling tools to support the implementation of the SDGs, the Paris Agreement, and Asian Development Bank's Vision 2030

There is no fee to attend; however, competition for places is high. Funding is also available for flights and accommodation.

Find out more at: <https://climatecompatiblegrowth.com/emp-apac-2025/>

Table 1.0 – List of Funding Opportunities

Theme	Health (Fellowship for Digital Health)	Health (Interdisciplinary epidemics)
Programme name	Transformative Technologies for Healthcare and Environmental Resilience (THER)	Interdisciplinary research to tackle epidemic threats
Funder / Delivery partner	ISPF / British Council through Edinburgh Napier University	UKRI, Defra, FCDO
Expected outcomes / Brief Description	Fellowship for early-career research to work at the University. This includes those without a permanent research-related post / academic post.	Funded projects are expected to become national or international focal points for epidemic-relevant interdisciplinary research in their chosen area. (Thai as co-lead only)
Priority area / Scope	Digital Health: 1) AI for fall prevention, 2) Robotics and AI in Healthcare, 3) Exoskeleton Robots for Rehab, 4) Autonomous EV for Emergency Services, 5) AI-Driven Body Area Networks for Monitoring, 6), IoT for Healthcare for continuous monitoring, and 7) AI for digital health and precision medicine	Interdisciplinary research to tackle epidemic diseases of animals, humans or plants, to better understand, predict, and prevent reemergence of infection. Pathogens (for example, bacteria, viruses, fungi, parasites and oomycetes) within all reservoirs are within scope, providing they have epidemic potential. This includes, but is not exclusive to: animals (aquaculture, farmed, companion and wild), humans, plants (crops, trees both horticultural and wild), natural environments, animal-human-environment interface.
Budget	3 early-career scholarships for Thailand, including bursary, research expense and other costs	Up to £3.75m
Duration	Minimum 10 months	Up to 5 years
Briefing	N/A	Webinar link below
Link	https://blogs.napier.ac.uk/ispf-early-career-fellowships/introduction/	https://www.ukri.org/opportunity/interdisciplinary-research-to-tackle-epidemic-threats/
Deadline	Rolling basis – Apply as soon as possible	19 June 2025
Contact	Professor Dr Hongnian Yu, at H.Yu@napier.ac.uk	tacklingepidemics@ukri.org

Theme	Health (Transdisciplinary AMR)
Programme name	Transdisciplinary research to tackle antimicrobial resistance (Phase 2)
Funder / Delivery partner	UKRI
Expected outcomes / Brief Description	<p>Funded project for transdisciplinary research to tackle antimicrobial resistance (AMR); it will provide key insights and deliver informed interventions to address antimicrobial resistance. (Thai as co-lead only).</p> <p>Funded projects are expected to become national or international focal points for AMR research and innovation.</p>
Priority area / Scope	<p>To better understand, detect, and disrupt the emergence of AMR in animals, humans, and plants using One Health and Planetary Health approaches. Microbes within scope include: bacteria, virus, fungi, protozoa, helminth. Reservoirs include human, animal, plants, natural environments, human-made environments, and food chain.</p> <p>Areas of thematic interest included in the website.</p>
Budget	£1-3m
Duration	Up to 5 years
Briefing	Webinar link below
Link	https://www.ukri.org/opportunity/notification-of-intent-transdisciplinary-research-to-tackle-antimicrobial-resistance/
Deadline	Submission of Notification of Interest by 18 June 2025
Contact	UKRI-AMR@ukri.org

Theme	Health (New Intervention)	Health (Mental Health)	Health (Translational research)
Programme name	Gap fund for early-stage development of new healthcare interventions	Mental Health Award: Leveraging longitudinal data to transform early intervention in mental health	Developmental pathway funding scheme: stage one
Funder / Delivery partner	MRC	Wellcome	MRC
Expected outcomes / Brief Description	Translational Project funding to generate critical data that builds confidence in developing a new or repurposed medicine, medical device, diagnostic test, or other medical intervention. (Thai as co-lead only).	Research to support data-driven or hypothesis-driven early identification models and advance their translational potential, aiming to create a step-change in early intervention for anxiety, depression and/or psychosis	Translational project to develop test novel therapeutics, medical devices, diagnostics and other interventions. It aims improve prevention, diagnosis, prognosis or treatment of significant health needs, or develop research tools that increase the efficiency of developing interventions. (Thai as co-lead only).
Priority area / Scope	All human diseases and medical interventions are eligible for support, both in the context of UK healthcare and addressing global health issues. Project should have already explored a new concept and generated some data in support of the approach.	Longitudinal datasets and develop innovative ways of identifying anxiety, depression and/or psychosis early	All diseases and interventions are eligible for support. Global health issues also eligible.
Budget	£50k – 300k	£1-5m	-
Duration	6 – 18 months	3 – 5 years	-
Briefing	N/A	7 May 2025	N/A

Theme	Health (Systems Medicine)	Health (Infection)	Health (Infection)
Programme name	Population and systems medicine: research grant	Infections and immunity: research grant	Infections and immunity: new investigator
Funder / Delivery partner	MRC	MRC	MRC
Expected outcomes / Brief Description	Research to unlock the complexity of human health and disease across the life course. This includes population health and the impact of environmental factors including the social environment on health outcomes. (Thai as co-lead only).	Research to develop scientific knowledge that extends our understanding of human infectious disease and the role of the immune system in inflammation, immune-mediated disease, and cancer. (Thai as co-lead only).	Support for new investigators to become independent researcher, with research that increases understanding within the field of infections and immunity. (Thai as co-lead only).
Priority area / Scope	Full research areas are broad and included in the link below	Discovery research area are broad and included in the link below	Discovery research area are broad and included in the link below
Budget	-	-	Typically under £1m
Duration	Typically 3 – 5 years	Typically 3 – 5 years	Usually 3 years
Briefing	N/A	N/A	N/A

Deadline	4 September 2025	4 September 2025	4 September 2025
Contact	psmb@mrc.ukri.org	iib@mrc.ukri.org	iib@mrc.ukri.org

Theme	Health (Systems Medicine)	Health (Molecular and Cellular med)	Health (Molecular and Cellular med)
Programme name	Population and systems medicine: new investigator	Molecular and cellular medicine: new investigator	Molecular and cellular medicine: research grant
Funder / Delivery partner	MRC	MRC	MRC
Expected outcomes / Brief Description	Support for new investigators to become independent researcher, with research to increase understanding within the field of population and systems medicine. (Thai as co-lead only).	Support for new investigators to become independent researcher, with research to increase understanding within the field of molecular and cellular medicine. (Thai as co-lead only).	Research into basic biological mechanisms or technologies relevant to human health and disease. (Thai as co-lead only).
Priority area / Scope	Full research areas are broad and included in the link below	Full research areas are broad and included in the link below	Full research areas are broad and included in the link below
Budget	Typically under £1m	Typically under £1m	-
Duration	Usually 3 years	Usually 3 years	Typically 3 – 5 years

Theme	Health (Mental Health)	Health (Mental Health)	Health (Experimental Medicine)
Programme name	Neurosciences and mental health: research grant	Neurosciences and mental health: new investigator	Experimental medicine stage one
Funder / Delivery partner	MRC	MRC	MRC
Expected outcomes / Brief Description	Research in neurosciences, mental health, and disorders of the human nervous system. This includes physiology and behaviour of the human nervous system throughout the life course in health and in illness, as well as how to treat and prevent disorders of the brain. (Thai as co-lead only).	Support for new investigators to become independent researcher, with research to increase understanding within the field of neurosciences and mental health. (Thai as co-lead only).	Funding for experimental medicine projects conducted in humans, with clear pathway to clinical impact. Project will produce new mechanistic insights, including those that may identify opportunities to modify disease pathways, or enable the future development of novel therapeutic or diagnostic approaches. (Thai as co-lead only).
Priority area / Scope	Full research areas are broad and included in the link below	Full research areas are broad and included in the link below	Intervention or challenge in humans, with safety profiles established, which has been designed to validate a mechanistic hypothesis. The challenge may be, but is not limited to pharmacological, immunological, physiological, psychological, infectious
Budget	-	Typically under £1m	Typically £1m
Duration	Typically 3 – 5 years	Usually 3 years	-
Briefing	N/A	N/A	N/A

Theme	Health (Vaccine)	Health (Vaccine)
Programme name	Innovations to Prepare for Future Epidemics and Pandemics	Innovative analytical technologies to improve vaccine manufacturing speed and equitable access
Funder / Delivery partner	CEPI	CEPI
Expected outcomes / Brief Description	Funding to advance a broad range of vaccine innovations for pathogens with epidemic or pandemic potential, including novel pathogens capable of infecting and causing disease in humans (i.e., Disease X). It supports vaccine research, development and manufacturing innovations	Funding to develop innovative analytical technologies for vaccines, with the goal to reduce vaccine development, manufacturing, and release times, lower costs, improve equitable deployment, and enhance analytical insights for vaccines such as RNA, viral vectors, or protein-based vaccines.
Priority area / Scope	<p>Focus Area 1: advancing innovative rapid-response vaccine platforms that can transform the response to a future Disease X</p> <p>Focus Area 2: developing new vaccine candidates against CEPI priority pathogens with epidemic or pandemic potential and viral families</p>	<p>Focus Area A: Minimizing time/cost to release/develop vaccine</p> <p>Focus Area B: Vaccine characterisation</p>
Budget	Varies from 1m-5m USD depending on scope	<p>Stage 1: 200k USD</p> <p>Stage 2: 800k USD</p>
Duration	18 – 36 months depending on scope	<p>Stage 1: 12 months</p> <p>Stage: 18 months</p>
Briefing	N/A	N/A

Theme	Climate	Climate	Climate
Programme name	Green Transition Fund: Nature-based Solutions	Indigenous Peoples and Local Community (IP&LC)	1:1:1 (public sector, philanthropic donors, and corporate partners)
Funder / Delivery partner	UKPACT	Legacy Landscapes Fund (LLF)	Legacy Landscapes Fund (LLF)
Expected outcomes / Brief Description	Funding for organisation to deliver technical Assistance and capacity building projects in the areas of Nature-based Solutions (NbS).	Funding to support Indigenous Peoples and Local Community (IP&LC) organizations engaged in area-based conservation	Funding to supports national and international NGOs engaged in area-based conservation through a new co-financing model
Priority area / Scope	Must respond to one of the following pillars: Work package 5.1) Transboundary policy frameworks and platforms for collective action on NbS, Work package 5.2) NbS models and monitoring; Financing for NbS research and development, Work package 5.3) Nature-positive financing and businesses	Area-based conservation activities that support a sustainable balance between ecosystem health, social and cultural well-being, and economic development for IP&LCs and their territories. This must take place in a ' Legacy landscapes ' – see full definition in guidance note. PI must be NGOs	Activities to support conversation through 2 scales of grant. This must take place in a ' Legacy landscapes ' – see full definition in guidance note. PI must be NGOs. Require 1:1:1 funding ratio (LLF, philanthropic donors - favoured, and corporate partners - mandatory)
Budget	Up to £800,000	1m USD per year	Perpetual grant: 1m USD per year / 50 years Sustaining grant: 1m USD per year / 15 years
Duration	15 months	Up to 15 years	
Briefing	8 May 2025	Q&A registration in website	Q&A registration in website

Theme	Social Sciences	Technology - Space
Programme name	90th Anniversary British Council Fellowships	International Bilateral Fund – Call 2
Funder / Delivery partner	British Council / University of Edinburgh	UK Space Agency
Expected outcomes / Brief Description	12-month Postdoctoral Fellowship at Institute for Advanced Studies in the Humanities (IASH), University of Edinburgh.	Funding to help strengthen UK space sector's international partnerships . There are 2 tracks to apply. (lead must be based in UK)
Priority area / Scope	Align with British Council overarching theme of 'a more peaceful and prosperous world built on trust', and strategy of 'We support peace and prosperity by building connections, understanding and trust between people in the UK and countries worldwide.'	Project also welcome partnerships with countries including emerging space nations. Track 1: To kickstart international relationships. If technology development, this would fall under TRL1-4 Track 2: Project with a level of maturity, and build on established partnerships. On technology, this corresponds to TRL5-9.
Budget	£2.5k bursary per month, plus travel expenses.	Track 1: £50,000 – 150,000 Track 2: £150,000 – 500,000
Duration	12 months	7 months, starting in 1 Sep 2025
Briefing	N/A	
Link	https://www.iash.ed.ac.uk/british-council-90th-anniversary-research-fellowships	International Bilateral Fund – Call 2 - GOV-UK Find a grant

Theme	Capacity Strengthening / Cross themes	Capacity Strengthening / Cross themes	Capacity Strengthening / Cross themes
Programme name	Research Collaboration Grant	Career Development Awards	Discovery Awards
Funder / Delivery partner	ISPF / British Council (Co-funded by NRCT, PMU-B, and PMU-C in Thailand)	Wellcome	Wellcome
Expected outcomes / Brief Description	Funding to support new research collaboration, or develop existing groups / international partnerships (including with non-academic organisations)	Funding for midcareer researchers to develop research and innovation to deliver shifts in understanding related to human life, health, and wellbeing.	Funding for established researchers to pursue ideas to deliver shifts in understanding related human, health, and wellbeing
Priority area / Scope	Thailand priorities are dependent on co-funders in Thailand ; AI, Genomics, Resilient Planet, Transformative Technologies, Healthy People Animals and Plant, and Developing Tomorrow's Talent. Please review full themes in guidance note.	Any disciplines, aligning with Wellcome Discovery Research theme , with potential to improve human life, health and wellbeing	Any disciplines, aligning with Wellcome Discovery Research theme , with potential to improve human life, health and wellbeing
Budget	£100,000 – 200,000	£250,000	On average £3.5m
Duration	Up to 2 years	Usually 8 years	Usually 8 years
